1 Introduction

The University of Pune has one of the largest Libraries in Pune city. The library operations are currently done in Manual mode, and all records are kept in Paper storage rather than Online Storage. Therefore, to improve the operationality of Library and to manage the data of all the Books issuance / returns from students, this system is necessary.

2 Problem/Impact/Successful Outcome

The Problem	The Impact	The Successful Outcome
<i>The Library is currently keep records in Offline mode and Management of books is manual</i>	<i>The impact of offline records are difficult to manage and book losses due to incorrect data are very high. The Availability of books also gets impacted due to offline data maintenance.</i>	<i>The new online Library Management system will be efficient to handle book availability, registered student information along with Book Issuance / return. The Fine system is also introduced to system so that it will improve the exchange on timely basis.</i>

3 Objectives

ID	Business Objective	Business Owner	Business Importance
O1	Reduce the manual work and automate the library work	Vishal Choudhary	
O2	Digitize all the book inventory and allow students to access it remotely and check the availability and reserve the books	Vishal Choudhary	
O3	Online book tracking and imposing fine for delay submission of books to students	Vishal Choudhary	
O4	Generate reports for the Librarian for the Management	Amit Jha	

4 Purpose Of Document:

The Purpose of this document is to document the process of Library Management systems at University of Pune. This document contains the As-Is process and To-Be process. The detailed high-level requirements along with Process flows are defined in the document. The outline of the project is defined in the scope and out of scope items.

5 Scope

In Scope	Out Of Scope
<i>1. User registration and authentication 2. Book catalog management</i>	<i>9. Notify me for availability of Book</i>

<i>3. Search and filter books</i> <i>4. Book issue and return management</i> <i>5. Fine calculation for overdue books</i> <i>6. Reservation/hold requests</i> <i>7. Notifications and reminders</i> <i>8. Admin dashboard and reporting</i>	<i>10. Notification regarding reservation of book</i> <i>11. Lock Renewal</i> <i>12. 2FA for login</i>
--	--

6 Definitions, Acronyms and Abbreviations

Abbreviation/Acronym	Description
PRN	Permanent registration number
2FA	2 Factor Authentication

7 Risks

Ref	Risk	Detailed BRS Reference
Rxx	-	

8 Assumptions

Ref	Assumption	Detailed BRS Reference
A01	The Process flow remains same	

9 Dependencies

Ref	Dependency	Detailed BRS Reference
Dxx	-	

10 High Level To Be Business Requirements

There are basically three main roles defined in the online Library Management system.

The Requirements gathered are as per the roles. The list is enumerated in the following tables as per the user Roles.

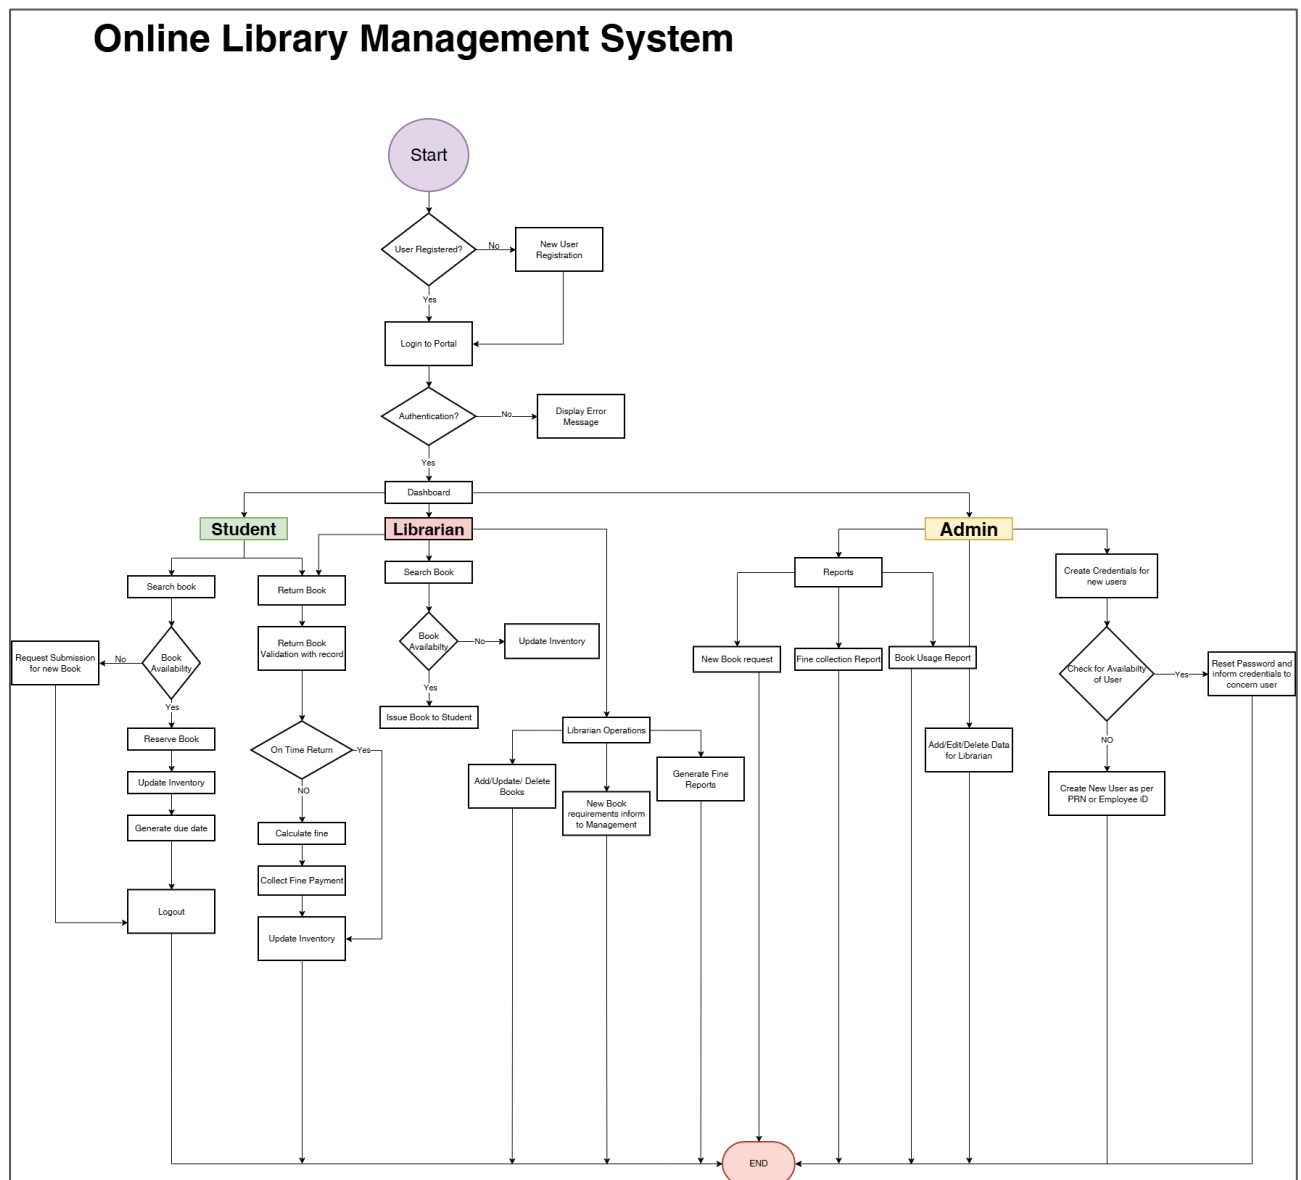

Student	
Registration	<i>Library fee deposit?</i>
Login	Login Page
	Forgot Password
	Change Password
Search	By Book name
Filter/Sort	By Subject
	By Author
	By Publisher
View	Dashboard

View	Student Dashboard	Books Usage Report Fine Generation Report New Books Request Report
New L	Reports Create Login credentials Add/Edit/Delete Librarian data	

11 Process Flow Diagram:

12 Business Impact Assessment

Lens	Key Impacts
Process	- The process of handling books simplified - The Book inventory is always updated - The fine collection data is available readily - The Process of fine collection becomes efficient along with fine calculation and generation
People	- The Student gets book data online - The Librarian has track of books and fines in system - The Student can do transactions online
Financial	- The process becomes easy hence the inventory loss is very less - Due to online fine calculation the exact fines can be levied and collected - Improved fine collection efficiency
Data & MI	- Inventory MIS is updated regularly hence there is no data mismatch - The Fine reports shows how much collected and pending given idea about the fines - About existing book usage and new book request, the management can take decision on books to be kept in library for efficient use of each book
Governance & Risk	- Operational risk impacts and where appropriate mitigation requirements - Risk and control framework impacts, e.g. changes to control owners - Regulatory compliance impacts and documentation/evidence of obligations met - New/revised governance

13 Appendices
